

# Hunter 41

At Hunter Marine, performance is about a lot more than just boat speed. We believe that true performance encompasses a complete package of maneuverability, ease of handling, balance, acceleration, and stability. The internal systems should also perform reliably and be easy to access. Our chief of engineering, Glenn Henderson, uses state of the art computer technology to combine optimized hull shapes, modern materials, and our most advanced construction methods into a package that performs for you in every respect. The Hunter 41 features a more vertical bow profile to maximize waterline length and decrease pitching motion. A special "stern reflex" on the underbody flattens out the stern wave increasing acceleration and overall speed potential. The result is an extraordinary performance package that feels great under sail and keeps your family comfortable whether you are on the ocean or at the dock.

Hunter believes that sailing should be easy and safe for the entire family. One should not have to break a sweat to enjoy a day on the water. The easy to manage B & R rig on board the 41 is matched with a powerful sail plan that puts the effort in the mainsail and a smaller, easily tacked headsail. For ultimate ease, a furling mainsail system is also available. Proper placement of the running rigging allows all operation from the safety of the cockpit. The standard stainless steel overhead arch keeps the traveler up and out of the way keeping the decks clear of the usual clutter. The arch also provides a great location to mount the bimini, stereo speakers and even overhead lighting, plus it's the perfect handhold while moving around the cockpit.

Whitlock® mechanical steering and a fold down table are central to the spacious 41 cockpit. Electronics space is versatile and the storage area is nothing short of spectacular. Plentiful contoured seating makes cruising and entertaining truly comfortable onboard the new 41. A large lazarette will hold extra sails and even a roll-up dinghy.

Additional storage is found on the walk-through platform, which includes a fresh water shower and telescoping swim ladder. Forward, dual anchor rollers lead to a deep chain locker with a recessed windlass for your convenience and safety. An aft hatch is located above the master berth offering good ventilation and rain protection under the cockpit seating. All chainplates are watertight and strengthened with hi-tech composites, and the location of the shrouds make transiting the wide decks safe and easy.

Plenty of light and air complement the designer fabrics and finely finished teak in the elegant salon. Custom cushions, a high-gloss table and special window treatments along with an extensive optional entertainment system are amenities you'll not want to miss. An enlarged nav station with space for repeaters and instruments is aft. Special, zoned overhead lighting and optional air conditioning allows you the capability to adjust light and air flow as needed.

The Hunter 41 galley will pleasantly surprise you! A separate custom stainless steel refrigerator and freezer are strategically positioned under genuine Corian® counters. Dual deep stainless steel sinks are recessed and surrounded by beautiful teak fiddles, which double as handholds. A glass-fronted, lighted dishware cabinet complete with dishes, a convenient pantry and a unique custom backsplash are just some of the special features you'll find aboard.

The aft master stateroom includes a queen size innerspring mattress, hanging lockers, plenty of drawers and abundant storage. Even a small vanity is included. Just forward is the dual entrance head with separate stall shower. The forward guest suite includes a wide double berth, vanity, extra storage plus a separate private head with shower.

## A Lifestyle of Luxury

The popular Hunter 41 and new 41DS continues their timeless tradition in superb interior design, featuring an elegant salon, high gloss table and custom window treatments, with special zoned overhead lighting. Galley features a separate custom stainless steel refrigerator/freezer cleverly housed beneath the Corian® counters, along with pantry and custom backsplash. Standard queen size aft stateroom offers drawer storage and vanity with private head entry. Forward guest suite includes double berth, vanity, storage and private head with shower. Optional three-cabin version is also available. New profile DS with its snappy sport sedan styling raises the headroom to 6'10."

- Cam cleats make light work of line handling
- Rope clutches are conveniently located within easy reach of the cockpit
- Anodized aluminum blocks are just one of the many features that make Hunter the value leader
- A dual entrance head with separate shower stall for the master stateroom

**Key Highlights (left and center)**

- The master stateroom has a queen size mattress, plenty of drawers and abundant storage
- The forward guest stateroom enjoys a double wide berth plus private head and shower
- Separate stainless refrigerator and freezer accompany dual sinks and convenient pantry in this extra spacious galley
- The large salon offers comfortable seating for 6 with telescoping dinette for additional sleeping space
